Dear Sir,

ACQUISITION OF 50% OF ZCE PLATINUM LTD ("ZCEP")

The Board of Aquarius Platinum Ltd is pleased to announce that it has agreed to purchase 50% of ZCEP from Zimasco Consolidated Enterprises Limited ("ZCEL"). The purchase price will be UK £26 692 307 (twenty six million six hundred and ninety two thousand three hundred and seven pounds sterling) to be settled by way of the issue of 6 862 658 (six million eight hundred and sixty two thousand six hundred and fifty eight) shares in Aquarius valued at £3.89 per share. This is based on the average price of Aquarius shares up to and including the date of board approval, and will represent 8.6% of the issued capital of Aquarius and 8.4% of the fully diluted capital on completion of the transaction. The purchase price amounts to US\$ 38.8 million at an exchange rate of US\$1.455 per pound sterling on the day preceding this announcement

ZCEP, which is registered in Mauritius, owns 100% of Mimosa Mining Company (Private) Limited ("Mimosa"), a company registered in Zimbabwe which exploits the Mimosa platinum property located on the Great Dyke in Central Zimbabwe. Impala Platinum Holdings Limited currently owns 35% of ZCEP.

The company produced 31 000 oz of platinum group metals and gold (PGMs) in the last financial year and is currently undertaking an expansion to increase production to 135 000 oz of platinum group metals and gold per year. On current price and cost assumptions, the Mimosa property is forecast to have a life in excess of 30 years following the expansion.

The project's mineral reserve estimated by Venmyn Rand currently stands at approximately 8.9 million ounces of PGMs and gold, of which approximately 4.4 million ounces are attributable to Aquarius. This resource is geologically constrained by the Main Sulphide Zone of the Great Dyke. The Mineral Resources and Reserves have been classified¹ as follows:

MEDIA RELEASE

AQUARIUS PLATINUM LIMITED BUYS 50% STAKE IN MIMOSA

"Long-term horizon for Aquarius", says CEO Stuart Murray

Aquarius Platinum Limited announced today (6 June 2002) that, with effect from 1 July 2002, the company would acquire a 50% stake in ZCE Platinum Limited which wholly owns the Mimosa Platinum Mine for a consideration of £26 million (US\$39 million). The consideration will be paid through the issue of 6.8 million new Aquarius Platinum shares.

Says Stuart Murray, CEO of Aquarius, "This transaction gives Aquarius Platinum a long-term horizon. Not only will this acquisition be immediately accretive to the earnings of Aquarius shareholders, but shareholders will participate in a more valuable company in the longer term. The deal transforms our company from its current 13 year life-of-mine to one which has a life-of-mine in excess of 30 years."

Murray also noted that the deal continues to strengthen relationships with Implats, Aquarius' strategic alliance partner. Implats purchased a 35% stake in ZCE Platinum a year ago and Mimosa's concentrate is shipped to South Africa for smelting and refining in terms of a long-term agreement with Impala Refining Services, an Implats subsidiary.

"Our partnership with Implats will serve as a sound basis for the strategic direction of the mine in the future," he said.

Mimosa is currently ramping up its production from 31 000 ounces to 135 000 ounces of PGMs per annum by the end of 2003, and there is further potential for low-cost expansion to in excess of 250 000 ounces per annum. The first phase of this expansion is fully-funded.

Mimosa's total PGM mineral resource of 18.3 million ounces has been verified by independent advisers Venmyn Rand - and indicates a life-of-mine in excess of 30 years. This has the effect of virtually doubling the attributable PGM mineral resources and reserves of Aquarius Platinum.

Murray concludes: "The mine is believed to be one of the lowest cost PGMs producers even by the standards of our Kroondal Mine, which is the lowest cost producer in South Africa. With its considerable nickel and copper production, Mimosa's cost (net of by-products) is around \$57 per platinum ounce."

Mimosa's operations fit well with the Aquarius operating model. The mine's shallow bord and pillar layout utilises a 1.8 metre stoping width in a simple mechanised operation. A conventional concentration process produces PGM concentrate, which is refined by Impala Platinum in South Africa. The metallurgy of Mimosa's ore is relatively uncomplicated since it does not have chrome issues to contend with.

MEDIA RELEASE

Murray concludes that although Aquarius is mindful of the perceived problems and risks associated with operations in Zimbabwe, shareholders should be reassured that the Mimosa mine continues to operate unhindered. In fact, the mine has National Project status in Zimbabwe with attendant currency management advantages and is set to derive benefits from the new fiscal regime being implemented for platinum mining in that country.
